Artec Logic Next VMS software features:

- Open Ended Software (Can add fire, intrusion, and Acc Control)
- Situational Awareness
- Mapping
- Object Analytics
- LPR (License Plate Recognition)
- Real Time Diagnostics
- Failover
- Watermarking
- Privacy Blur
- Area Analytics
- 3 user levels
- Bandwidth Optimization
- 5 Modes of event notification
- When purchase license you get software, web client and mobile client free with Unlimited Users

- Available in different versions, each with varying levels of analytics capabilities. This allows users to apply the correct analytics application to suit their needs and budget instead of a one-size-fits-all approach.

- ARTECO-LOGIC uses up to 18 independent filters to isolate objects based on what matters most to the security environment.

- Available in three versions: Basic, EZ and PRO, Artec analytics allow for the ultimate in flexibility between price and intelligent video capability per channel today.
