

One Solution. Three Platforms. Infinite Possibilities.

Sentry VMS is an IP Complete video management system that is simple to use and value priced.

Sentry VMS includes a full featured VMS application with a 17-year proven track record of reliability. The application is installed on hardware specifically designed to process video and utilizes the latest in RAID storage technology. Whether the product is managing one or an unlimited number of video streams and event triggers, Sentry VMS is a truly scalable enterprise security system.

- IP Complete video surveillance system (software, hardware and storage)
- Made in the USA security systems since 1996
- On-staff IPVideo programmers provide responsive customization and integration solutions
