## Pre-Install Notice

This installation guide is only required for those who did not purchase the PREMIUM ViewScan package or for those who wish to install ViewScan on a separate machine.

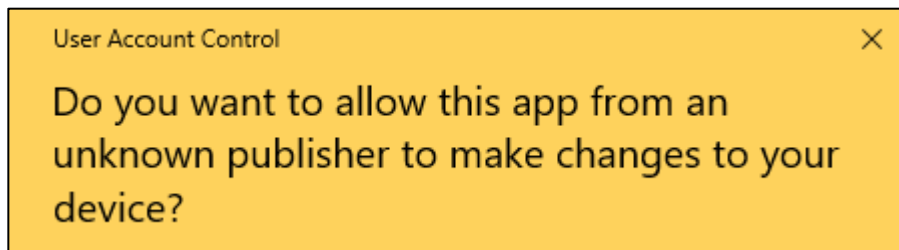

For those with PRO & BASIC ViewScan packages please follow the instructions below to install ViewScan on the designated machine.

## Installation Steps

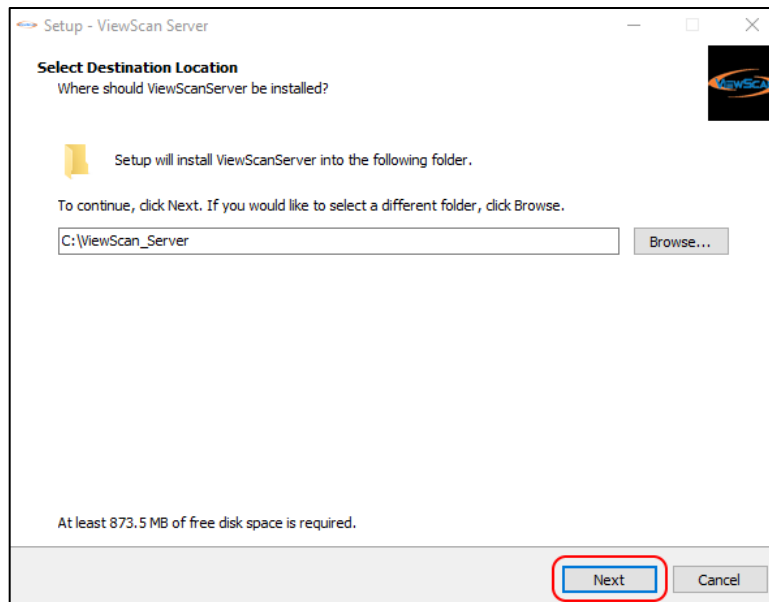

1. Run the supplied installer.

Name	Date modified	Type	Size
 ViewScan_Server_Setup.exe	5/10/2021 3:54 PM	Application	393,700 KB

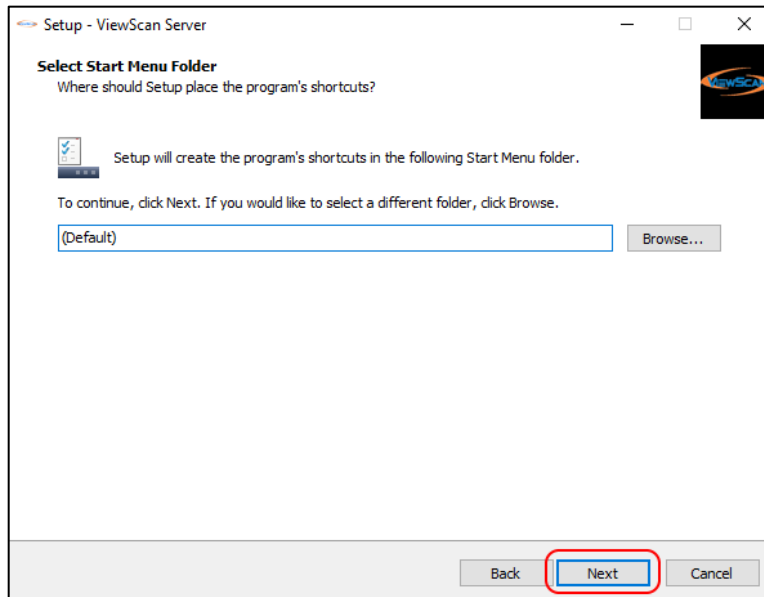

2. Allow the installer to make changes. **Yes.**

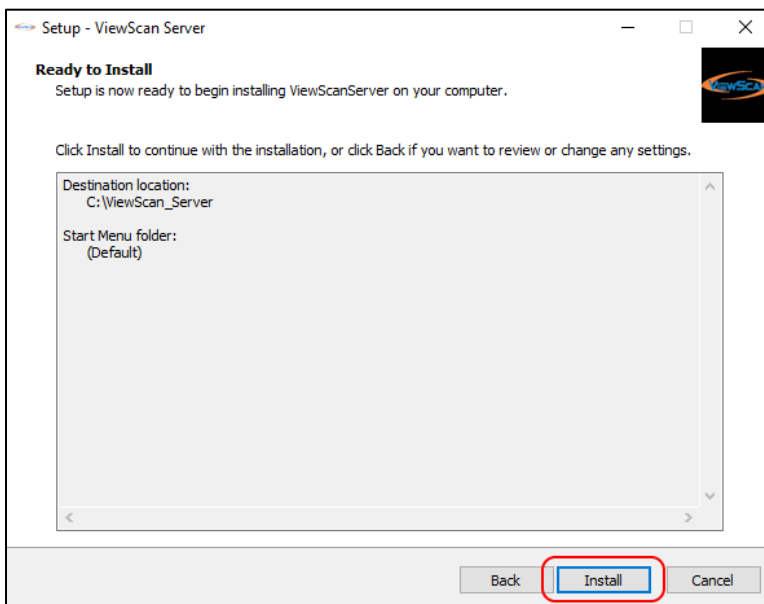

3. Leave the C: drive as the install folder. **Next.**

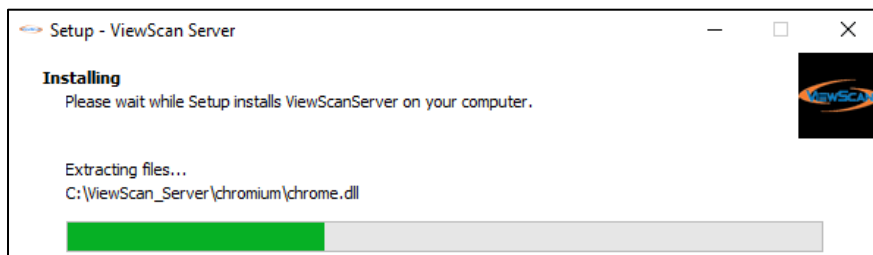

4. **Next.**

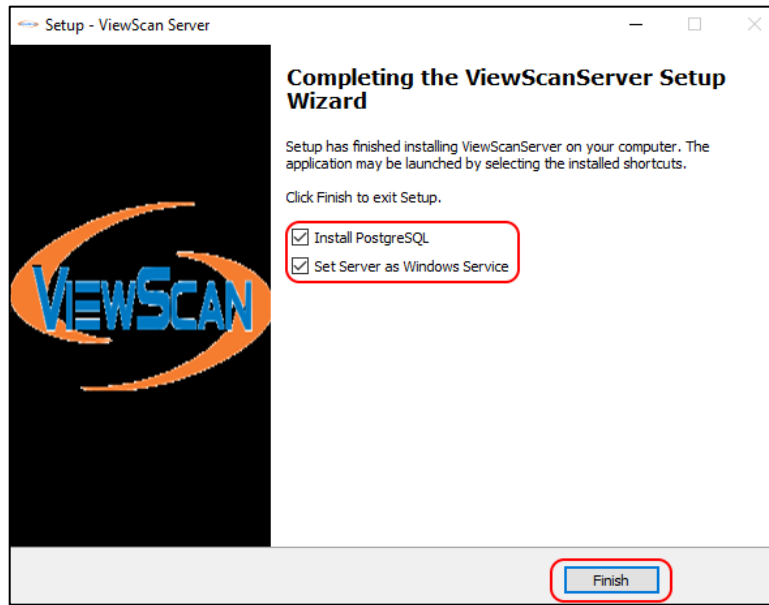

5. Install.

6. Allow the installation to complete.

7. Leave the two checkboxes selected. **Finish.**

8. Allow Postgre SQL 12 to install. **Yes.**
9. Allow the installation to complete.
10. Once complete, allow the application to be set as a service.

## Post Install Check

The application should now be installed, and 3 shortcuts will have been placed on the desktop:

1. ViewScan Controller
2. Find Camera
3. Find Scanner

Name	Date modified	Type	Size
 Find Camera	5/12/2021 2:28 PM	Shortcut	1 KB
 Find Scanner	5/12/2021 2:28 PM	Shortcut	1 KB
 ViewScan Controller	5/12/2021 2:28 PM	Shortcut	1 KB
